User Title	Story	Business Value	Estimation	Status
use database	As a user I want to use the application fast even if there are lots of data in it, I want to reach data if another user uses it and I want the possibility to back up the data so if some data is lost then it is easily recoverable (hint: use PostgreSQL database instead of csv files; you don't have to implement backup now).	2000	3 hr	*ToDO*
display latest questions	As a user, I want to see the latest 5 submitted questions on the main page (**/**). I want to see somewhere a link to all of the questions (**/list**).	800	1 hr	*ToDO*
search questions	As a user I want to search in questions & answers. There should be a search box on the main page and a button. If I write something in the search box and press the button, I want to see a list of all questions (same data as in the list page) which title or description contains the searched phrase or which have answers which message contains the text in the search box. (**/search?q=<search phrase>**)	1100	3 hr	*ToDO*
edit answer	The site should allow to edit the posted answers. (**/answer/<answer_id>/edit**)	1000	1 hr	*ToDO*
add comment to answer	As a user I want to add comments to an answer. There should be a link or button on the question page next to or below the answer with which I can reach the new comment page (**/answer/<answer_id>/new-comment**). The comment should be visible on the question page together with its submission time.	1100	2 hr	*ToDO*
add comment to question	As a user I want to add comments to a question. There should be a link or button on the question page with which I can reach the new comment page (**/question/<question_id>/new-comment**). The comment should be visible on the question page.	1200	2 hr	*ToDO*
